74LCX07

General Description

The LCX07 contains six buffers. The inputs tolerate voltages up to 5.5 V allowing the interface of 5 V systems to 3 V systems.

The outputs of the LCX07 are open drain and can be connected to other open drain outputs to implement active HIGH wire AND or active LOW wire OR functions.

The 74LCX07 is fabricated with advanced CMOS technology to achieve high speed operation while maintaining CMOS low power dissipation.

Features
